

Pink Pad EXT™

Prolonged Positioning System

■ Prevents HAPI formation

Patented Pink Pad EXT material provides both immersion and envelopment to protect peak pressure points like the scapula, sacrum and heels. This helps deter pressure injury formation—ensuring better surgical outcomes. Protecting the integrity of the patient’s skin complies with CMS guidelines for avoiding positioning related injuries categorized as Never Events.

■ Prevents Unwanted Moisture

The open-celled material of the Pink Pad EXT helps manage the microclimate by wicking away perspiration that can leave the skin moist and vulnerable to HAPI formation.

■ Repeatable Universal Standard of Care

Xodus offers a variety of kits to meet your procedural requirements. Please visit our website for additional details and configurations.

Available with DermaProx™ lined arm boards or One-Step Arm Protectors™.

40601 Pink Pad EXT Complete Kit

- 1 Pink Pad EXT
- 1 Lift Sheet
- 1 Knee and Body Strap
- 1 Headrest
- 1 Pair of Standard Arm Protectors
